A Brighter Future
3.9% of mental health research funding goes towards prevention.

£9 spent on mental health research per person affected.

Funding for mental health research has remained flat over the 10-year period 2008-2017.
2.7% of mental health research is funded by charity compared to 68% of cancer research.

25x more is spent on cancer research than mental health research.
The sector average for BAME participation in medical research is 6.7% of all volunteers. Through our Participate platform we have increased this by 43% above sector average.

75%... but only 26% of mental health research focuses on young people. Of mental health problems develop before the age of 18.
Growing Talent

MQ will invest in inspiring new talent and expand the capability and quality of research.
MQ will invest in research programmes that drive innovation in policy and practice and challenge the status quo.
Challenging Inequalities

MQ will invest in research that closes the inequalities gap
Engaging People

We want to see the number of people actively supporting mental health research increase three fold, as well as engage a diverse group of individuals to take part in and inform our research projects.
